ABSTRACT

the study was carried out in the experimental apiary at the dep. of Apiculture of the Thracian University Stara Zagora, Bulgaria. Honey samples from nine regions in Syria were collected. The content of: water (%); dry matter and ash (%); invert sugar (%); fructose (%); sucrose (%); acidal number; Ca; P; Fe; Cu; Zn; Mg; K; Na and protein were determined. The ranges of variation of the above indices were found out.
